Donor-Egg Programs – Elective Single Embryo Transfer

For many couples, this approach represents the most balanced and effective way to achieve a successful pregnancy while minimizing medical risk. At Embryon Fertility, we believe that science and empathy belong together. Each program is designed to create emotional peace and mental clarity, supported by personalized guidance from our team, so you can focus on what truly matters – becoming parents.

Everything Matters™

From planning to communication, everything you experience with Embryon Fertility is shaped to create emotional peace and mental clarity in a process that can often feel overwhelming.

The Embryon team – all walked this path themselves as donors, surrogates, or intended parents – understand the emotions, the waiting, and the hope. This shared experience allows them to anticipate your concerns and meet them with genuine understanding.

Our programs are carried out at the Institute for Reproductive Medicine (IRM) – a cutting-edge, AI-driven fertility clinic spanning more than 1 900 m², founded in 1994. Built from the ground up as a modern centre of excellence, IRM continues to evolve, adopting the latest proven reproductive techniques while remaining a place of genuine care and trust.

A Match Made in Heaven Ukraine

At Embryon, we believe that mental clarity and emotional peace are as essential as medical excellence in donor-egg IVF. Our top 5 % of prequalified candidates are meticulously screened for genetic health, family history, and personal integrity – mature, compassionate egg donors who are mothers themselves, bringing both proven fertility and genuine understanding to every journey. Each is selected according to the gold standard for donor qualification, ensuring genetic reliability and peace of mind for every intended parent. With Embryon, every detail matters – from start to birth.

The Trusted Choice

With nearly 30 years of experience, Embryon Fertility and the Institute for Reproductive Medicine (IRM Kyiv) have established one of Ukraine’s most trusted programs in donor-egg and surrogacy IVF. Our reputation is built on measurable results – consistent success rates, transparent pricing, and the quality of our carefully selected donors and surrogate candidates.

Every program follows a proven medical framework developed over decades of clinical experience. That structure – clear, transparent, and outcome-driven – is why intended parents from around the world place their confidence in Embryon. Because trust isn’t promised – it’s earned through actions that align with words, transparency and reliability.

Egg Donor Profile Platform – Powered by “Orchid”

Our Egg Donor Profile Platform, powered by “Orchid”, introduces a new level of enhanced search capabilities to the donor-matching process.

It provides access to a curated selection of Ukraine’s Top 5% of prequalified egg donors, each thoroughly screened for medical, genetic, and psychological readiness. Profiles include key information to support informed decision-making and are continually reviewed to ensure accuracy and availability.

Whether choosing from fresh or cryopreserved oocytes, Embryon’s platform delivers a seamless and verified experience – redefining how families explore and select qualified donors.

Embryon’s donor matching means clarity and control – a transparent process designed to make one of life’s most personal decisions feel right.

Your Path to Parenthood

| Stage | Approx. Duration | What Happens |
|--|------------------|--|
| Consultation & Registration | 1 day | Program selection, initial guidance, and documentation. |
| Medical Screening | 2-3 weeks | Laboratory results reviewed and readiness confirmed. |
| Endometrial Preparation | 14-21 days | Natural or assisted cycle prepares the uterus. |
| Fresh Oocyte Retrieval & Fertilization | 5 days | Donor oocytes fertilized to create strong embryos. |
| Embryo Transfer & Confirmation | 1 day + 10 days | Transfer at IRM Kyiv, followed by β -hCG pregnancy test. |

High Quality & Affordable Excellence

True value lies in clarity, not complexity. At Embryon Fertility, our programs are structured to maintain transparency and emotional balance at every step. Pricing reflects thoughtful coordination, clear communication, and the personal care that defines the Embryon Family.

This may not be the least-cost path, but it's the one where you'll always feel informed, supported, and understood. We call it Accessible Excellence – the meeting point between professional reliability and emotional peace.

| Program | Description | EUR |
|--------------------|---------------------------------|----------|

Optional services: PGT-A €400 / embryo · FET €1 850 · One-year cryostorage included. Prices in EUR, invoiced in UAH at the NBU exchange rate on the invoice date.

Male Factor Diet | Improved Sperm Quality

Even when oocytes are donor-sourced, sperm quality remains an essential part of success. Our Male Factor Diet, supported by CoQ10 supplementation, helps improve sperm count and morphology through practical nutritional and lifestyle measures.

Next Steps

From your first consultation to confirmed pregnancy, the Embryon Family will be by your side – a steady, transparent presence through each stage. Our goal is simple: trust, transparency, and peace of mind.
